Mohammad Alman Farooqui

Portfolio | +91 6377588366 | almanfarooqui5@gmail.com | LinkedIn | GitHub

Education

Manipal University Jaipur Jaipur

B.Tech in Computer Science (AI & ML) — CGPA: 8.66 *2024 – 2028*

Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, NoSQL Databases, Computer Networks, Operating Systems, Cloud Computing

Experience

Software Development Centre, Manipal University Jaipur | Software Developer Intern Aug 2026 – Present

- Developing and maintaining production-grade internal software used by the college, collaborating with the team using Git-based workflows and modern software engineering practices.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS
Databases: PostgreSQL, MongoDB, Firebase, Supabase
Tools & Platforms: Git, GitHub Actions, Postman, Docker, AWS

Projects

Tempora | Python, AWS (CloudTrail/CloudWatch), CI/CD, MITRE ATT&CK **PyPI** | **GitHub**

- Built and published a cloud-native forensic toolkit for analyzing AWS CloudTrail and CloudWatch logs using Python generators with $O(1)$ **memory processing**.
- Automated threat detection for IAM privilege escalation, impossible travel, and PII leakage by mapping events to **MITRE ATT&CK** techniques.
- Designed a decoupled API architecture and automated CI/CD pipeline using **GitHub Actions** for testing, publishing, and PyPI releases.

FeedbackPulse | Next.js, React, TypeScript, Node.js, Express, PostgreSQL, Prisma **Live** | **GitHub**

- Developed a plug-and-play feedback collection platform with an embed script + projectKey flow, enabling setup across websites in **under 2 minutes**.
- Implemented JWT + Google OAuth authentication, server-side pagination, domain allowlisting, webhooks, and Gemini-based sentiment tagging workflows.
- Built scalable backend APIs using Node.js and Express to process feedback data and trigger AI-powered sentiment classification pipelines.

CabMate | Python, FastAPI, React, MongoDB, Docker, AWS EC2, Google Maps API **Live** | **GitHub**

- Architected a Dockerized FastAPI-based ride coordination platform deployed on AWS EC2.
- Implemented location-aware driver-passenger matching using **MongoDB geospatial indexing** and RBAC for secure role-based coordination.
- Designed 15+ REST APIs supporting authentication, ride coordination, and role-based operations using FastAPI.

Certifications & Achievements

AWS Certified Cloud Practitioner (CLF-C02) *Amazon Web Services, 2026*

- Passed the AWS Cloud Practitioner certification exam, demonstrating foundational knowledge of AWS cloud services, architecture, and deployment

National Finalist in SBI Finnovation Hackathon *IIT Jodhpur* | **GitHub**

- Developed **Symbiote**, an open-source Android security assistant that detects phishing attempts and financial scams using on-device analysis. Selected among the final 12 teams out of 220+ registered teams.
